

## JUMO smartWARE Evaluation – Software for Evaluating and Visualizing Process Data from the JUMO variTRON System (701840)

- Unlimited access – browser-based process data evaluation via customizable dashboards
- Process data overview – fast navigation and dashboard selection based on intuitive device and plant overview
- Effective access protection – secure data transfer from the JUMO variTRON via REST API to the Datastore (data diode)
- Run anywhere – can be installed on desktop, server, or cloud
- Batches at a glance – plant-wide batch evaluation
- Cost efficiency – cost savings for software administration, as maintenance is only required in one place
- Report module for automatic report generation – (at batch end, periodically, event-controlled)
- Individual report layouts based on report templates, can be created using Designer

### Order details

<b>(1) Basic type</b>	
701840	JUMO smartWARE Evaluation
<b>(2) Number of signals</b>	
10	10 Signale (XXS)
25	25 signals (XS)
50	50 signals (XS)
75	75 signals (XS)
100	100 signals (S)
250	250 signals (S)
500	500 signals (S)
750	750 signals (M)
1000	1000 signals (M)
1500	1500 signals (M)
<b>(3) Batch module</b>	
0	without
1	Batches (XXS/XS)
2	Batches (S)
3	Batches (M)
<b>(4) Report module</b>	
0	without
1	Reports (XXS/XS)
2	Reports (S)
3	Reports (M)
