

Router Module 2-Port – Module for the JUMO variTRON Automation System (705041)

- Compatible with JUMO variTRON as of system version 3
- Decentralized module assignment supported
- Arrangement on DIN rail (lateral system bus input and output)
- System bus expansion via RJ45 sockets on the front (2 × Bus Out)
- Galvanic isolation of the system bus connections
- Quick wiring of operating voltage and system bus achieved by simply plugging the modules together

Order details

(1) Basic type	
705041	Routermodul 2-Port
(2) Voltage supply	
36	DC 24 V +25/-20 %
(3) Extra codes	
000	Without extra code

Order code

(1) (2) (3)
 / /

Planning data: module width 22.5 mm, current consumption 70 mA (at DC 19.2 V)
